MEMORANDUM FOR:

Director, Intelligence Community Staff

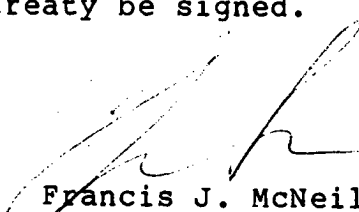

SUBJECT:

Contadora: Verification Monitoring Tasks

25X1

Since we talked yesterday, Harry Shlaudeman and I have completed a review of the intelligence requirements which the Community will need to meet in order to verify implementation of any Contadora Treaty. I have attached a catalog of monitoring tasks which break these requirements out in some detail.

I know Paul Gorman has anticipated many of them, but--as I noted yesterday--I think it would be most useful to review the tasks at next Tuesday's Caribbean Basin Intelligence Steering Group meeting. We might want to consider forming a Working Group to assess our resources and ensure that we will have the monitoring capability should a treaty be signed.

Francis J. McNeil
Deputy Assistant Secretary for
Intelligence and Research

Attachment:
As stated

SECRET/SENSITIVE

Contadora: Verification Monitoring Tasks

Arms Limitations/Reductions

- Confirm that illegal installations are not established/maintained.
- Detect construction of prohibited installations.
- Count manpower strengths of the ground forces, air forces, naval forces and para-military forces to confirm compliance with ceilings.
- Count limited weapon systems to confirm compliance with ceilings.
- Confirm that banned weapon systems are not present or introduced.
- Count the number of limited weapons systems that are imported at the port of entry--to ensure that a like number are removed from the country or destroyed.
- Confirm that limited weapons systems that have been replaced are removed from the country or are dismantled and/or destroyed within a specified time after receipt of replacement weapons system.

Subversion

- Detect covert caches of arms/supplies in target countries or in supplier countries.
- Detect dispatching points for illegal arms.
- Detect illegal flow of arms/supplies into the target country by land, sea or air.
- Identify persons, groups or organizations that have participated in the coordination and the commission of trafficking in arms and other support to insurgents.
- Determine whether supplier country's government is directly involved or condones use of its territory by other Parties.

SECRET/SENSITIVE
DECL: OADR

SECRET/SENSITIVE

- 2 -

-- Detect guerrilla training areas, logistics bases, base camps, or command, control, communications and intelligence facilities in adjacent countries.

-- Detect clandestine radio broadcasting stations.

Foreign Military and Security Advisers

-- Count departing foreign military and security advisers as they embark upon ships or airplanes at ports and airfields.

-- Maintain complete access to all facilities where there is reason to believe foreign military personnel may be located.

-- Count remaining foreign military and security personnel who are subject to reductions to confirm compliance with interim ceilings.

-- Count foreign military and security personnel who are excluded from reductions but are subject to an overall ceiling.

-- Detect the presence of covert foreign military and security advisers.

-- Detect the presence of prohibited foreign military facilities.

-- Detect national or joint military maneuvers prohibited or regulated under the Act.
